SX200 ADSL ROUTER MODEM

Strong points of the SX200 ADSL Router Modem:

Multi-user: all the people present on your Ethernet network can connect to the Internet simultaneously, only one ADSL subscription is required.

Multi-platform: PC (Ethernet and USB port), MAC and LINUX (Ethernet port only) compatible.

Ethernet and USB ports: for convenience purposes, the Router is equipped with an Ethernet port and a USB port.

Integrated NAT Firewall: effective protection against undesirable intrusions.

Permanent high-speed connection: a single ADSL subscription for all users, unlimited Internet connection.

Simultaneous Internet and telephone: possibility to surf the Web and use your telephone at the same time.

Downloads: continuous high-speed downloading of music, video, films, images and information.

Online games: play online round-the-clock with Web users from all over the world.

Plug and Play: easy installation

Quick configuration: with Web browser.
